EDUCATION

Istanbul Technical University

Artificial Intelligence and Data Engineering
GPA: 3.38/4.00 (Honor Student)

2021 – 2026
Istanbul, Turkey

WORK EXPERIENCE

Data Scientist | AI Engineer Architect

July 2025 – Present
Istanbul, Turkey

- Developed LLM-based assistant and agent components with LangChain to support multi-stage enterprise workflows
- Integrated internal services as AI tools through structured tool-calling, API-based execution flows, and clear tool schemas
- Contributed to MCP-based tool-serving infrastructure to standardize access to internal tools across LLM applications
- Implemented stateful, tool-using agent workflows with error handling for tool failures and partial responses
- Improved agent behavior through prompt refinement, workflow design, and evaluation of response quality
- Contributed to RAG pipeline improvements by evaluating retrieval quality, ranking strategies, and context relevance

Undergraduate Research Assistant Learning from Data and Optimization Lab, ITU

January 2025 – Present
Istanbul, Turkey

- Built fairness-aware recommendation systems using LLM-based models and compared results against standard baselines
- Applied LoRA (PEFT) to fine-tune recommender models more efficiently and reduce computational overhead
- Evaluated performance on real-world datasets, analyzing trade-offs between accuracy and fairness metrics

Software Engineer Commencis

September 2024 – July 2025
Istanbul, Turkey

- Built embedding-based suggestion engines for semantic retrieval to improve personalized content relevance
- Built LLM-powered NLP features and evaluation workflows for internal and customer-facing AI applications
- Implemented end-to-end audio pipelines (diarization, ASR) to improve downstream data quality
- Contributed to LLM feature development for an application using RAG pipelines

Software Engineer Intern Commencis

June 2024 – August 2024
Istanbul, Turkey

- Implemented backend microservices using FastAPI and Spring Boot, following best practices for secure banking workflows
- Built secure REST APIs and managed persistence with MongoDB, optimizing access patterns where needed
- Prototyped speaker diarization and transcription components to support production audio pipelines

CERTIFICATIONS

DeepLearning.AI: Machine Learning Specialization, Deep Learning Specialization
IBM: Data Science Professional Certificate | **Harvard:** CS50 Introduction to AI with Python

SKILLS

Programming Languages: Python, C++, Java, SQL

AI & Machine Learning: LangChain, LangGraph, MCP, PyTorch, vLLM, RAG, Fine-tuning (LoRA)

Data & Software Engineering: Apache Kafka, Apache Spark, Apache NiFi, FastAPI, Spring Boot, Hadoop

Storage & Infrastructure: Milvus, Elasticsearch, MongoDB, Docker, Git, AWS, Azure

Languages: English (Fluent), Turkish (Native), German (Beginner)
